Step 1: Fix the heater on the floor. Bore three holes in the floor, fix the heater by three wedge bolts on the floor tightening the screws by spanner.

Complete

Operation

Connect the power cable to a 13 amp supply that is located in a safe, dry area.

Press the power switch on the heater when the plug had been connected.

Press the touch switch one time to operate the heater on 1500W.

Press the touch switch second time for off.

- Although the patio heater is shower proof, do not use when raining or in wet conditions.
- Always disconnect the power cable from the electrical supply, when the patio heater is not in use.

Technical specification

- Power supply 220-240V 50-60Hz
- Wattage 1800W
- Insulation class I

Care and maintenance

- When disconnected from the electrical supply, clean the outside of the patio heater with a damp cloth. Never use corrosive or solvent cleaners or immerse in water.
- Any maintenance or repairs including replacing the halogen tube should only be carried out by a qualified electrician or by a recommended service center.

STORAGE

If the heater will not be used for a long period of time, store it in a cool, dry location when not in use. To prevent dust and dirt build-up, use the original packaging to repack the unit.

TROUBLE SHOOTING

If the heater will not operate, please check the following before seeking repair of service:

- Check if the power cord is plugged into an electrical outlet, if not plug in.
- Check if electricity to the main fuse is working.
- Make certain the power switches are turned on. If not, choose a setting.

WEEE

This symbol on the product or in the instructions means that your electrical and electronic equipment should be disposed at the end of its life separately from your household waste. There are separate collection systems for recycling in the EU. For more information please contact the local authority or your retailer where you purchased the product.
